Can an installer build greater efficiency into a tight budget and timeline?

Highlights

- Apply Backstop® NT and AquaFlash® as a continuous air and moisture barrier to 750,000 sq ft of the megaplex, even on the sections where Outsulation® Plus MD isn't used

- Use Outsulation® Plus MD system to make a 376,000 sq ft structure look like a series of buildings with different facades

"The expertise, the information given to us, the means and the methods, the products are the best that we know of."

– Phil Bouthillette, Project Superintendent for Hoar Construction

Of course!

Dryvit's Backstop® NT and AquaFlash® systems provide the superior performance and flexibility needed to accelerate timelines, while cutting costs.

"Dryvit is the best in the business and its technical support exceeds other manufacturers. My guys love applying it."

– John Ramby, applicator for OKInteriors Corp

PROJECT NAME:
Liberty Center, outside Cincinnati, OH

DEVELOPER:
Steiner + Associates

ARCHITECTURE FIRM:
KA, Inc.

GENERAL CONTRACTOR:
Hoar Construction

APPLICATOR:
OKInteriors Corp

DRYVIT DISTRIBUTOR:
Interior Supply, Inc.

The story:

Challenge

Build a megaplex of mixed-use retail, residential and office buildings – including a single building designed to mimic the look and feel of a city block – on a compressed timeline with a restricted budget.

Solution

Use Dryvit Backstop® NT and AquaFlash® on the entire project in a seamless, air- and water-resistive barrier. Use Outsulation® Plus MD system, along with other claddings, to provide an aesthetically pleasing look.

Result

Accelerated the dry-in process, allowing interior construction to start sooner.
